- All outlets are at floor level.
- Extension cords and power strips are not permitted: each location needs its own outlets (guide: one outlet per device).
- Power figures are catalog estimates; final values will be updated once equipment is confirmed.
- The VR motion seat alone draws 220 VAC 9 A; a dedicated circuit is recommended.
- Laptop outlets are placed at the LAN drops of the PCs they serve (one outlet per laptop), including the presenter's laptop at L7.
- The VR360 Simulator alone draws 2,800 W (≈ 12.2 A at 230 V); a dedicated circuit is recommended.
- The plan page shows the power at each equipment position (red, W) and the laptop outlets (PC).

- Centre height is measured from the floor (carpet) to the screen centre; the top edge is approximate (screen height plus bezel).
- Walls are H2700; reinforcement (backing) is needed at each mounting position.
- One power outlet per screen, at floor level below the screen; the cable runs up the wall behind it.
