- Extension cords and power strips are not permitted: each location needs its own outlets (guide: one outlet per device).
- Power figures are catalog estimates; final values will be updated once equipment is confirmed.
- The VR motion seat alone draws 220 VAC 9 A; a dedicated circuit is recommended.
- The VR360 Simulator alone draws 2,800 W (≈ 12.2 A at 230 V); a dedicated circuit is recommended.
- The plan page shows the power at each equipment position (red, W).
